THANK YOU FOR APPLYING TO THE ECO EDGE CERTIFICATION

This document presents the summary observations during the assessment of your organisation by the team of assessors and Eco Edge team. We believe it is essential for businesses to know how it is progressing in achieving excellence in sustainability performance as a VCP (Value Chain Partner) of Apraava Energy. Such an external perspective allows the entity to know how it measures the various performance indicators, and attempts to improve through appropriate action, thereby reaping consequent business benefits.

The overall assessment is based on more than 70 indicators, conducted for OEM as well as its upstream and downstream partners, across five focus areas: General, Decarbonization, Circularity, Health & Safety, and Human Rights. Assessment was done as desk assessment of the questionnaires. Capacity building sessions were organized, addressing each focus area, providing clarity on queries and help in filling the questionnaire. The assessment was conducted by third-party assessors remotely. These assessments also served as instructional opportunities, allowing VCPs to benefit from seasoned assessors' inputs. The findings and guidance from assessments are formally presented in this report.

We encourage your organisation to use this Gap Report as a pointer to your sustainability performance, work on the various strengths and opportunities to make yourself a more efficient and hence sustainable business entity. For this goal, and even otherwise, please feel free to seek the help and professional services of the CII-ITC Centre of Excellence for Sustainable Development.

Please feel free to contact us for any further clarification.

Ms. Seema Arora
Deputy Director General

About ECO Edge

- The CII Eco Edge program integrates sustainability in the value chains of companies, including MSMEs.
- It assesses sourcing companies and their Value Chain Partners (VCPs) across Human Rights, Circularity, Health & Safety, Decarbonization, and sector-specific indicators.
- Eco Edge supports sustainable value chains through an internally developed framework, implemented via a SaaS-based tool
- This program supports companies in managing Scope 3 emissions, building a network of sustainable vendors, and adapting to the evolving global regulatory landscape for value chain sustainability.

The program portfolio comprises the following components:

Capacity Building Programs:

The program supports sourcing companies in assessing their value chain partners (VCPs) on ESG parameters. It helps identify high-risk VCPs needing support, highlights top performers on specific KPIs, and provides insights for setting improvement targets.

Sustainability Assessments:

The program supports sourcing companies in assessing their value chain partners (VCPs) on ESG parameters. It helps identify high-risk VCPs needing support, highlights top performers on specific KPIs, and provides insights for setting improvement targets.

Maturity-Based Certification

Certifications are awarded to sourcing companies and VCPs meeting defined performance thresholds. The certification levels—Eco Edge Emerging, Eco Edge Progressive, and Eco Edge Trailblazer—reflect

BRSR Core Dashboard

The Eco Edge framework is aligned 98% with BRSR Core

BRSR Core is a subset of the Business Responsibility and Sustainability Report (BRSR) mandated by SEBI (Securities and Exchange Board of India) for the top 1000 (by market capitalization) listed companies. It comprises a set of Key Performance Indicators (KPIs) under nine ESG attributes.

The dashboard below presents a visual overview of the company's response coverage against BRSR Core indicators, highlighting areas where data is reported or not. This overview can help identify potential areas for improved data tracking and more comprehensive future disclosures.

BRSR Attribute	Parameter	Data Availability
Green-house Gas (GHG) footprint	. Total Scope 1 emissions	No
	. Total Scope 2 emissions	No
	. GHG Emission Intensity (Scope 1 +2)	No
Water Footprint	. Total water consumption	No
	. Water consumption intensity	No
	. Water Discharge by destination and levels of Treatment	No
Energy footprint	. Total energy consumed	No
	. % of the energy consumed from renewable sources	No
	. Energy intensity	No
Embracing circularity – details related to waste management by the entity	. Total waste generated	No

BRSR Attribute	Parameter	Data Availability
Enhancing Employee Wellbeing and Safety	. Spending on measures towards the wellbeing of employees and workers – cost incurred as a % of the total revenue of the company	No
	. Details of safety-related incidents for employees and workers (including contract workforce e.g. workers in the company's construction sites)	No
Enabling Gender Diversity in Business	. Gross wages paid to females as % of wages paid	No
	. Complaints on POSH	No
Enabling Inclusive Development	. Input material sourced from the following sources as % of total purchases – Directly sourced from MSMEs/ small producers and from within India	No
	. Job creation in smaller towns – Wages paid to persons employed in smaller towns (permanent or nonpermanent /on contract) as % of total wage cost	No
Fairness in Engaging with Customers and Suppliers	. Instances involving loss/breach of data of customers as a percentage of total data breaches or cyber security events	No
